5. Risk exposure

5.1 Interest rate risk

Interest rate risk is that which the company faces due to unfavorable movements of the interest rates. Changes in the government's monetary policy, along with increased demand for loans/investments tend to increase the interest rates. Such rises in interest rates mostly affect companies having floating rate loans or companies investing in debt securities.

Management perception:

Since the Unique Hotel & Resorts Limited has not borrowed funds at flexible interest rate, hence, not involved in the interest rate risk. The company has been repaying borrowed funds on a continuous basis.

5.2 Exchange rate risk

Exchange rate risk arises due to changes in exchange rates. As the Company imports equipment from abroad and also earns revenue in foreign currency, unfavorable volatility or currency fluctuation may affect the profitability of the Company. When exchange rate is increased against local currency opportunity is created for generating more profit.

Management perception:

Unique Hotel & Resorts Limited management changes the price of their services to cope with the change in exchange rate to mitigate the affect of unfavorable volatility in exchange rate on the company's earnings.

5.3 Industry risks

Industry risk refers to the risk of increased competition from foreign and domestic sources leading to lower prices, revenues, profit margins, market shares etc. which could have an adverse impact on the business, financial condition and results of operation.

Management perception:

The Company continuously carries out research and development (R&D) to keep pace with the customer choices and fashions.

5.4 Market risks

Market risk refers to the risk of adverse market conditions affecting the sales and profitability of the company. Mostly, the risk arises from falling demand for the product or service which would harm the performance of the company. On the other hand, strong marketing and brand management would help the company increase their customer base.

Management perception:

The company's brand "Westin" has a very strong image in the local and international market. Starwood Asia Pacific Hotels & Resorts Pte. Ltd. (the operator) also has the reputation of providing quality hotel management services. Moreover, the demand for five star hotels in the country is increasing while there are very few five star hotels to meet the demand. Strong brand management and quality service has enabled the company to capture significant market share in the sector and the company is continuously penetrating into the market and upgrading the quality of their service to minimize the risk.

5.5 Operational risks

Non-availabilities of materials/equipment/services may affect the smooth operational activities of the Company. On the other hand, the equipment may face operational and mechanical failures due to natural disasters, terrorist attacks, unforeseen events, lack of supervision and negligence, leading to severe accidents and losses.

Management perception:

The Company is equipped with power backup and security (CCTV) systems, which reduce operational risk. Besides, the equipment is under insurance coverage in order to get reasonable compensation for any damages. Apart from these, routine security check and proper maintenance of the equipment also reduce/eliminate the operational risk.
